Limited Edition Cherry

A7X

Limited Edition Cherry

The A7X, ADAM's best selling speaker and one of the most balanced and versatile speakers currently on the market, has been designed with one goal in mind: To reproduce audio signals as precisely as possible, without beautifying elements or concealing them.

Besides the capability for neutral reproduction, the need for unique precision in the higher frequency range becomes immediately apparent with highly transient, dynamic audio material in particular. The X-ART tweeter, ADAM's signature feature, embodies this kind of precision. With a nearly flat frequency response reaching up to 50 kHz, our proprietary, handmade in Berlin tweeter sets the standard in terms of transparency and clarity. The worldwide success of the A7X in the professional audio market is based to a great extent on the exceptional capabilities of the X-ART tweeter.

Each driver has its own dedicated amplifier. A 50W A/B amp is responsible for the X-ART tweeter, while the midwoofer is being driven by a 100W PWM amp. The front panel includes a power switch and a control for the volume that retains the volume setting independently from the on/off switch. On the rear panel are several additional controls: a gain for the high frequencies (± 4 dB) and two shelf filters for high and low frequencies.

The A7X's translucent sound image, tonal depth and stereo localization inspires music producers and explains why it is by far the most reviewed and award-winning monitor in recent years.

Technical Data

- Handmade X-ART tweeter
- 7" bass/mid woofer (carbon/Rohacell/glass fiber)
- On/off switch and Volume Control on the front panel
- Inputs: XLR + RCA
- Amplification: tweeter 50W (RMS), bass/mid woofer 100W (RMS)
- Frequency response: 42Hz - 50kHz
- Max. Peak SPL (per pair): 114dB
- Tweeter gain
- Low/high shelf filters
- 5 years warranty

Awards

Reviews

"Believe it or not: 7 different critics have each come to the same conclusion: The review winner out of the 9 different speakers is the ADAM A7X!"

Chris Reiss, tools4music

"The A7X from ADAM Audio wins the race a long way ahead of the rest."

Sound & Recording: Top 5 Studio Monitors

"I expect the ADAM A7X to dominate the conversation for a long time to come."

Barney Jameson, DV Magazine

"Seldomly you get so much sound in this price range. Congratulations to ADAM. Mission accomplished."

Hifi-Stars

"I personally loved the A7X monitors from the minute I took them out of the box! They are very accurate and have a flat response, a lovely detailed sound and they will not break the bank, but should provide you with an accurate mix."

Tony Long, Absolutemusic

"...extremely lively and 'shareful' sound with the finest high frequency resolution."

stereoplay

"...I'd be tempted to choose them over anything else in a similar price range."
