

Warning

Every person involved with the installation, operation and maintenance of this system has to:

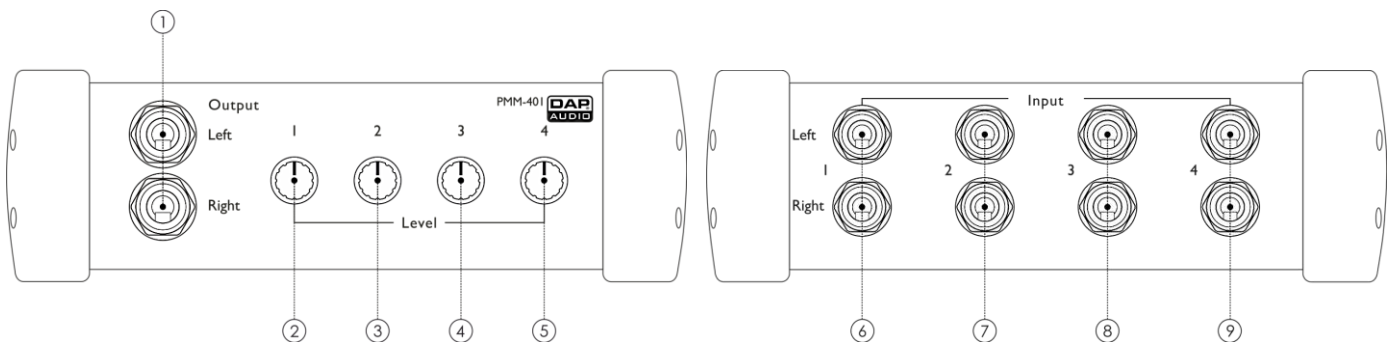

- be qualified
- follow the instructions of this manual

Description

The PMM-401 is a four channel passive mixer for expanding a mixer with extra line signals. It requires no batteries or other power sources. When all controls are turned completely clockwise, the unit can be used as a 1-in 4-out box. It is a useful tool that will help you with unforeseen situations.

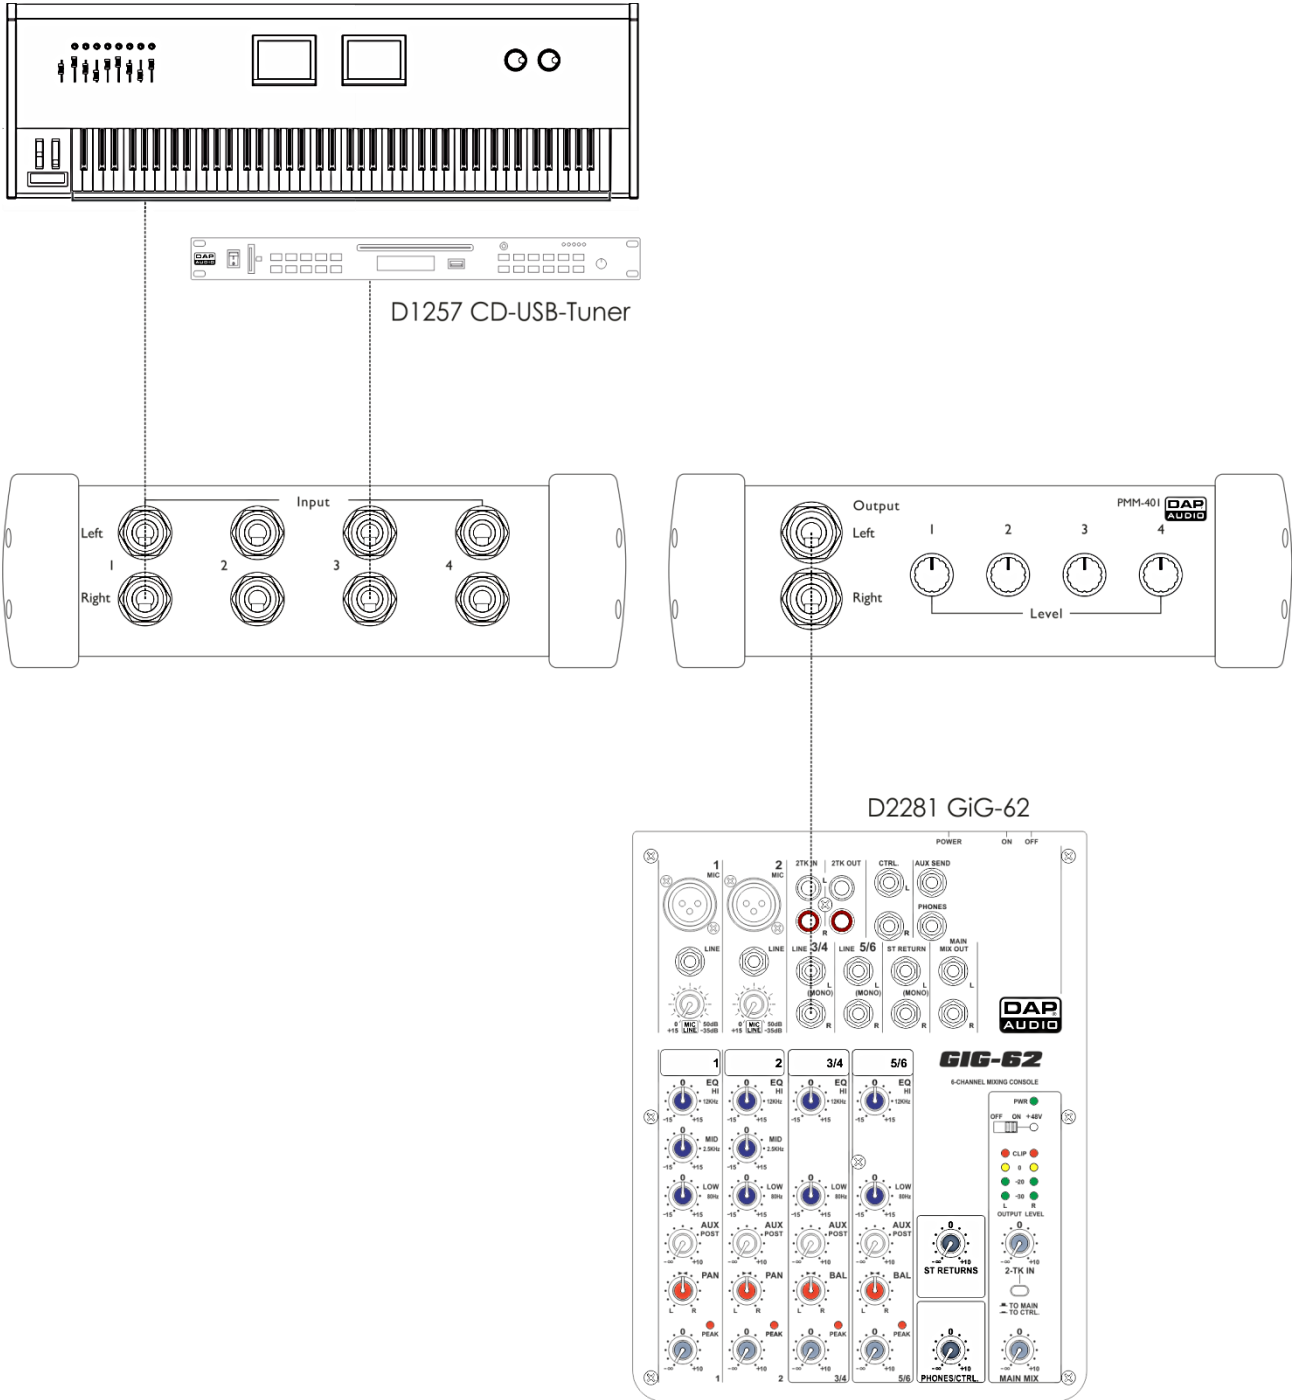

- No power-supply needed
- Stereo in- and outputs
- 4-in, 1-out mixer
- 1-in, 4-out splitter

Overview

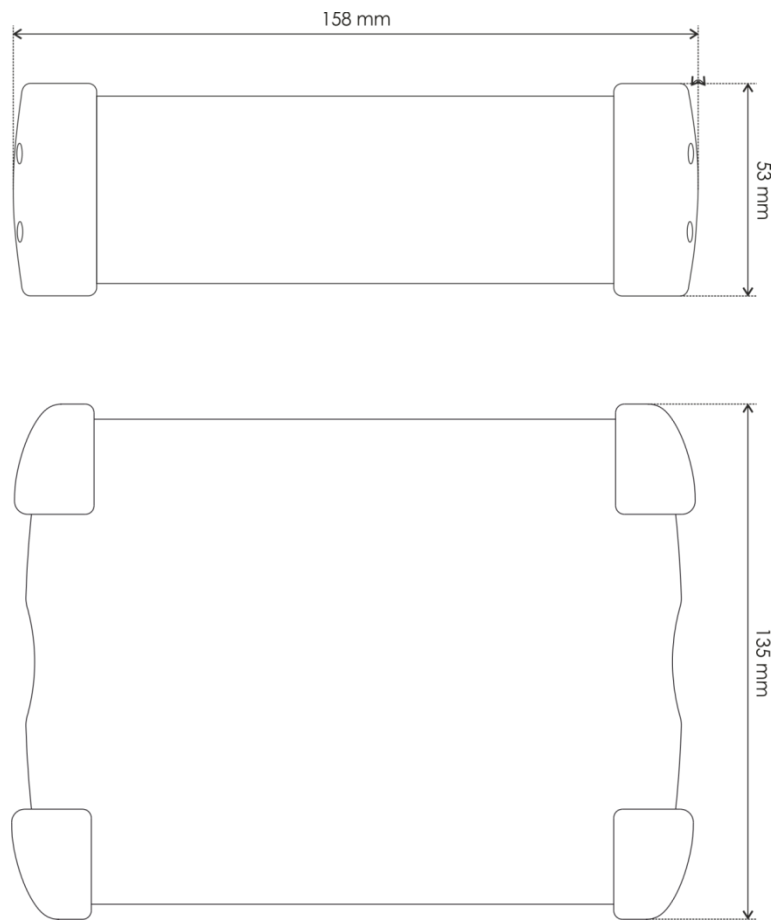

- ① The outputs are unbalanced 1/4" TRS sockets and provide the main mix signal.
- ② The volume control adjusts the level of the channel 01 signal.
- ③ The volume control adjusts the level of the channel 02 signal.
- ④ The volume control adjusts the level of the channel 03 signal.
- ⑤ The volume control adjusts the level of the channel 04 signal.
- ⑥ Unbalanced input 1/4" TRS sockets, channel 01.
- ⑦ Unbalanced input 1/4" TRS sockets, channel 02.
- ⑧ Unbalanced input 1/4" TRS sockets, channel 03.
- ⑨ Unbalanced input 1/4" TRS sockets, channel 04.
