Mono subwoofer output
with integrated active
crossover

3 x Mic input

Effect loop

Zone outputs:
2 x Master stereo,
1 x Zone mono

CM-5300 Club Mixer

The new central organ in clubs. It is not directly responsible for producing the beats, but for delivering the right volume in the right places – with the best sound possible. Predestined for this task is the Omnitronic **CM-5300**. The 5-channel mixer distinguishes itself especially with its well thought out equipment.

Each of the stereo input channels is equipped with gain control, 3-band kill EQ (+12/ -26 dB) and 10-digit LED level display. The 3 microphone channels offer individually controllable one knob compressors, which control the levels under different microphone handling. Besides the sub out with crossover and the two master outs, an additional zone out is integrated, for example for filling the bar in a club with mono sound – thanks to the filter, not lower than 80 Hz. All outputs have been equipped with max level controllers.
