- Conceived and designed by BEHRINGER Germany

### What Do DJs Need From Their Headphones?

DJs are just like any other professional who relies on their ears for a living. Above all else, they need clean, accurate audio reproduction. BEHRINGER HPX6000 Professional DJ Headphones deliver on this with massive 50 mm neodymium drivers. That means when you wear these headphones, you not only get loud, clean sound – you also get deep, powerful bass. So, no matter what kind of music you listen to, you'll hear everything from the gut-shaking lows to the lip-smacking highs.

### All Work and no Play Makes Jack a Dull Boy!

Having great sound is one thing, but being a DJ is also about style. You don't just have to sound good—you have to look good, too. The HPX6000 takes style and comfort to a whole new level! On top of their rugged construction, we made sure to choose the right materials to give these headphones a classic look and feel. From the soft

touch rubberized coating to the leather ear cushions and headband pad, these phones feel fantastic on your head or in your hands. And we include a carrying bag in the package to make sure they stay that way.

### Comfort is Key

So even though they look and sound amazing, if they aren't comfortable that's a deal breaker. We know you wear your headphones all night long, so we made sure you could adjust everything about the HPX6000s. The headband and ear cups are fully articulated and adjustable, and can be worn on the head or around the neck single cup style. They are also foldable, allowing for easy carrying and storage. To top it all off, the detachable cable makes it even easier to store them away.

BEHRINGER HPX6000 Professional DJ Headphones provide all of this at a price that will surprise you. Now you CAN have it all—amazing sound, stylish comfort and real value.
