

# Configuring Traktor Pro 2 for the DJConsole Rmx2 (Windows version)

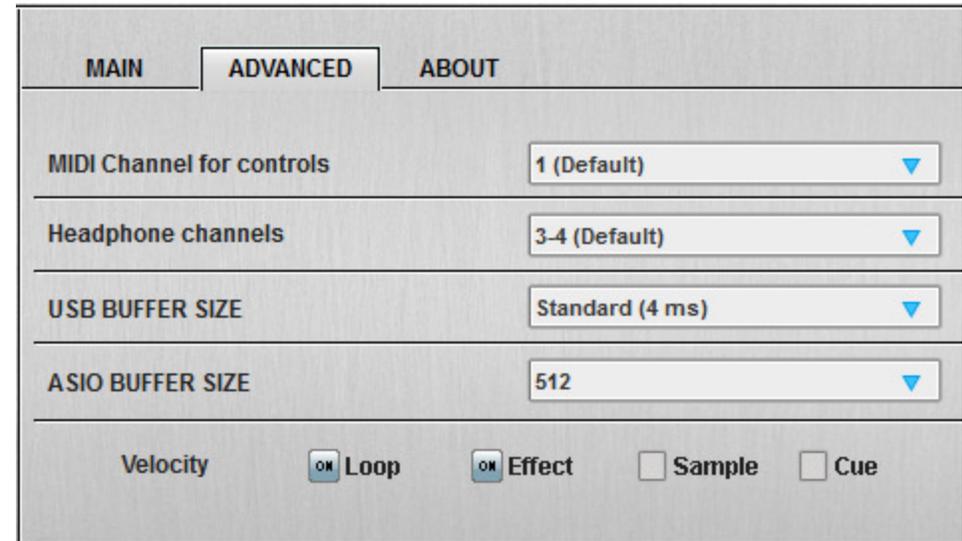

## 1- Configuration of the ASIO driver/ MIDI channel

Open the **DJ Console control panel** , and from the **ADVANCED** tab, make sure the following parameters are set correctly:

a) **MIDI channel** is set to **1 (Defaults)**.

If you have multiple MIDI controllers, or would like to use the DJ Console on a different MIDI channel, you will need to modify the profile accordingly. Consult Traktor's user manual for more details.

b) **Headphone channels** is set to **3-4 (default)**

c) Select the **USB buffer size** and **ASIO buffer size** you wish to use.

As no computer system is the same, you will need to experiment in order to find the correct values for your specific configuration.

**NOTE:** This setting cannot be modified while Traktor is running.

d) Disable the pad **Velocity** for both **Sample** and **Cue**.

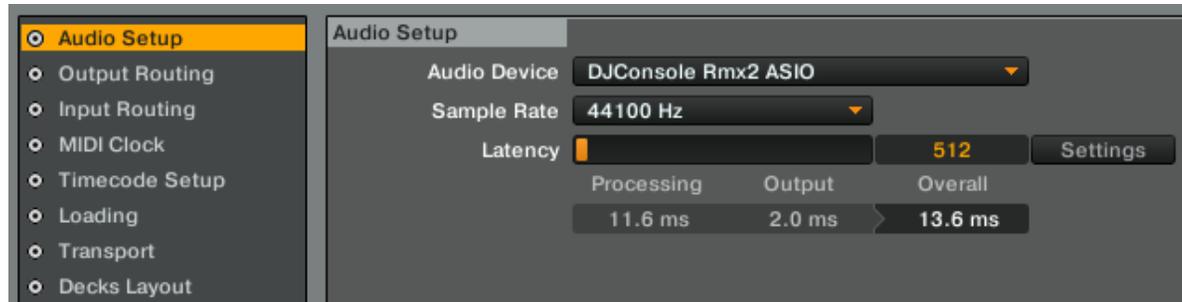

## 2- Audio configuration in Traktor Pro 2

a) From the main menu, select **File > PREFERENCES**, and select **AUDIO SETUP**.

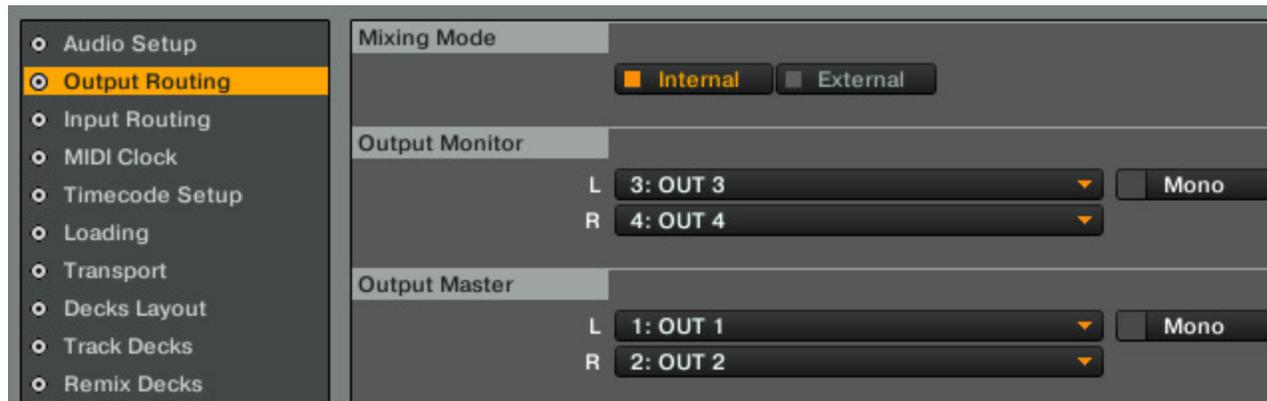

Choose **DJConsole Rmx2 ASIO** as **Audio Device**.

Notice that LATENCY should reflect the configuration previously made in the Control panel.

b) Under **Output Routing**,

- Under **Mixing Mode**, select **Internal**.
- Set **Out 3 & 4** for **Monitor** and **Out 1 & 2** for **Master**.

### 3- Configuration of the Midi controllers in Traktor Pro 2 (Version 2.50)

a) At the bottom of the configuration menu, click the **Import** button to locate and select the **.TSI** configuration file.

b) A menu will then display the different categories that will be imported.

c) In **Controller-Manager**:

- For **Device**, select – **DJConsole Rmx2 - Generic MIDI**
- Select **DJConsole Rmx2** for both **In-Port** and **Out-Port**.

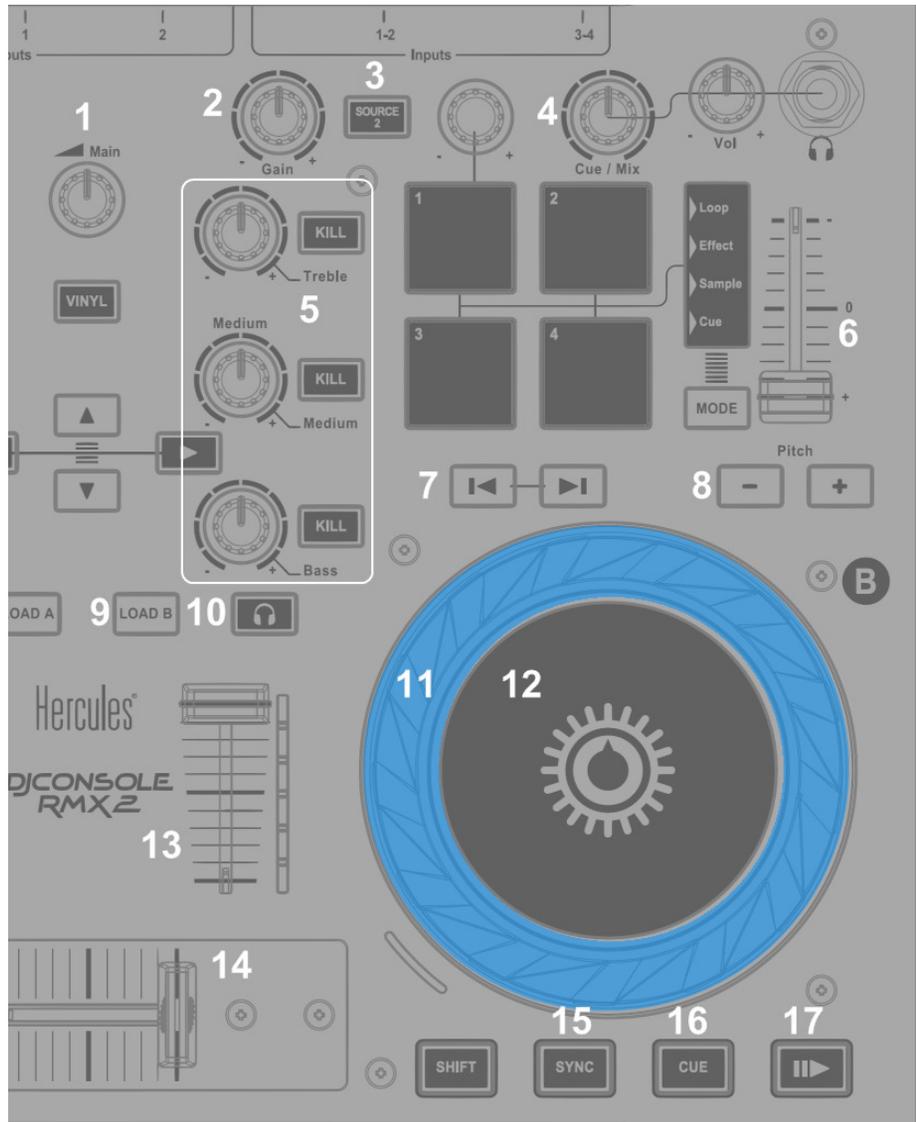

**This menu also give you access to the various MIDI settings, should you wish to modify them (Consult chapter 13.21 – Controller Manager of the user manual for more details).**
